

Pipeline Accessories

Aqua Stopper  
Pipeline Closure Plugs  
4 pipes

# Aqua Stopper Pipeline Closure Plugs 4 pipes

**Aqua Stopper pipeline closure and testing plugs allow pipe ends to be sealed quickly and securely.**

## The Product

Aqua Stopper pipeline closure plugs are mainly designed to **seal open pipe ends** on pipelines of all kinds. The Aqua Stopper plugs are also made for **pressure testing** of pipeline parts with water or air.

The sealing element of the Aqua Stopper plugs is expanded and activated by turning the wingnut at the front on the outlet thread. The outlet with the integrated thread is designed for filling, emptying and pressure testing the pipeline.

## Applications

- Overnight pipe capping
- Repair
- Pressure testing
- Manhole inspection
- Cleaning and flushing
- General pipeline installation
- Temporary closure for wall penetrations

## For pipelines made of:

- Steel
- Plastic
- Ductile iron
- Clay
- Pipes with inner coatings

## Advantages

- Quick and easy application
- Reusable many times
- Secure seal for pressure test with water or air
- Tight up to 1.5 bar with an applied holding fixture – depending on pipe size
- 2 in 1 = Sealing as well as filling and testing options
- Reasonably priced

**Aqua Stopper closes core drilled hole**

\*with additional holding fixture

## Application

For a perfect function of the Aqua Stopper please consider the following points:

1. The pipeline inner diameter must fit to the sealing range of the chosen model.
2. Clean the stopper before and after application.
3. The Aqua Stopper should be positioned at a right angle to the pipe, close to the pipe end.
4. Close wingnut.
5. For a pressure test we strongly recommend a separate holding fixture for sealing and safety reasons.

The 4 pipes warranty only applies to faulty material. Checking the suitability of the product for the individual application is solely the responsibility of the user.
